ABSTRACT

A comprehensive listing of degree programs and program options/specializations offered in Washington's two-year and four-year, public and independent colleges and universities in 1979-80 is presented. The report is organized alphabetically by both institution and program. Each listing reflects both the preferred institutional program title and the title and code number used by the Higher Education General Information Survey. (SW)

The 1979-80 Program Register is the only comprehensive listing of degree programs and program options/specializations offered to students by Washington's two- and four-year, public and independent colleges and universities.[1] It is specifically intended for use by students, potential students, their counselors and academic advisers, as well as secondary, postsecondary and state-level educational planners.

The report is organized alphabetically by both institution and program. Each listing reflects both the preferred institutional program title and the title and code number used by the U. S. Office of Education Higher Education General Information Survey (HEGIS) to collect degree/certificate award data at the national level.[2]

The format for this report is loose-leaf, three-hole punched so that supplements to the Register can be prepared and distributed annually until a complete revision becomes necessary.

We invite your comments and suggestions for improving the Program Register. If additional information is desired about an individual program, please contact the appropriate institution. (See Section III for a listing of institutional addresses.)

[1] Institutions accredited by the Northwest Association of Schools and Colleges.

[2] Beginning this year, the Program Register supersedes another CWE publication, the Degree Inventory. A summary report of Trends in Degrees Conferred, 1973-74/1978-79, is available from the Council for Postsecondary Education office.

FOUR-YEAR COLLEGES AND UNIVERSITIES, PUBLIC AND PRIVATE

Most four-year institutions allow students to design their own major (most particularly, The Evergreen State College) by taking courses in a combination of disciplines. See Section I and institutional catalogs to determine possible areas of study.
